*Debt management* Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee,2012-03-07

This report highlights four main areas of ongoing concern relating to debt management: regulation of consumer debt, payday loans, debt management companies and the Money Advice Service. It makes a number of recommendations for future Government action including reforms for higher licensing fees to be charged for higher-risk credit businesses, for a fast track procedure be put in place to suspend credit licenses, and for the new regulator be given the power to ban harmful products. The Financial Services Bill did little to clarify the way in which the consumer credit market is to be regulated. The Committee also wants be certain that the payday loan industry adheres to the highest standards - either through the codes of practice that are currently being developed or, failing that, by the new regulator. Regulations also need to be introduced to ensure that debt management companies publish the cost of their debt advice and their outcomes, if an agreement cannot be reached during discussions with the industry. Furthermore, effective auditing of debt management companies' client accounts needs to be established. The Money Advice Service needs to provide details of its business plan. Given that the legal aid budget for such services is being cut by 75% the Minister's assertion that there will be no diminution of face-to-face debt advice is confusing. The Money Advice Service will be up and running by April and yet its remit, and in particular its relationship with highly respected brands such as Citizens Advice, remains unclear

**The Financial Crisis and White Collar Crime - Legislative and Policy Responses** Nicholas Ryder,Umut Turksen,Jon Tucker,2017-09-19 This book offers a commentary on the responses to white collar crime since the financial crisis. The book brings together experts from academia and practice to analyse the legal and policy responses that have been put in place following the 2008 financial crisis. The book looks at a range of topics including: the low priority and resources allocated to

fraud; EU regulatory efforts to fight financial crime; protecting whistleblowers in the financial industry; the criminality of the rogue trader; the evolution of financial crime in cryptocurrencies; and the levying of financial penalties against banks and corporations by the US Department of Justice and Securities and Exchange Commission.

**Consumer Law and Policy** Iain Ramsay, 2012-10-25 This new edition continues to provide a critical introduction to the legal regulation of consumer markets, situating it within the context of broader debates about rationales for regulation, the role of the state and the growth of neo-liberalism. It draws on interdisciplinary sources, assessing, for example, the increased influence of behavioural economics on consumer law. It analyses the Europeanisation of consumer law and the tensions between neo-liberalism and the social market, consumer protection and consumer choice, in the establishment of the single market ground rules. The book also assesses national, regional and international responses to the world financial crisis as reflected in the regulation of consumer credit markets. This edition incorporates recent legislative and judicial developments of the law, blending substantial extracts from primary UK, EU and international legal materials.
